

Schedules of Compliance

EPA estimates that owners and operators of five percent of all units submitting a Part B permit application (2 units) will submit a schedule of compliance with their Part B permit application. Of these units, owners and operators of approximately one percent (approximately zero units) will submit an alternative schedule of compliance, and one percent (approximately zero units) will submit an application for two compliance schedules. EPA does not anticipate that any facilities will submit evidence of firm public commitment to cease conducting regulated activities.

Permit Modifications and Special Permits

Permit Modifications

(1) Transfer of Permits

In addition to the permit modifications discussed below, EPA estimates that ten owners and operators will submit the written agreement required to transfer ownership or operational control of a facility.

(2) Permit Modification at the Request of the Agency

Based on 1994-1996 RCRIS data, an average of 173 facilities will seek Class 1, 2, or 3 permit modifications during the period covered by this ICR.

(3) Permit Modification at the Request of the Permittee

As stated above, EPA expects 124 facilities will submit Class 1 permit modifications during the period covered by this ICR. Approximately 124 facilities will submit information required under 270.13 through 270.21 and 270.63 for Class 1 modifications. An additional 49 facilities will submit the Class 2 or 3 modifications.

(4) Temporary Authorizations

EPA estimates that 25 percent of the facilities seeking a Class 2 or Class 3 permit modification at their own request (12 facilities) will submit a request for temporary authorization under §270.42(e).

(5) Newly Regulated Wastes and Units

EPA does not estimate that any rules will regulate new wastes or units in the period covered by this ICR.

(6) Corrective Action Management Units

EPA estimates that no facilities will designate a corrective action management unit (CAMU). Therefore, no facilities will initiate modifications to their permits to incorporate the CAMU (264.552(g)).

Expiration and Continuation of Permits

EPA estimates that 20 facilities will submit applications annually for permit renewal during the period covered by this ICR. This number is based on information from RCRIS regarding the number of permits issued between October 1, 1994 and October 1, 1996 (i.e., an estimation of those expected to expire during the timeframe covered by the ICR), discounted by the percent EPA expects will pursue closure rather than renew permits. EPA estimates that the burden for preparing and submitting the Part B renewal application is comparable to the burden for Class 2 or 3 modification requests.

Special Forms of Permits

(1) Hazardous Waste Incinerator Permits

All owners and operators of incinerator facilities applying for a Part B permit (11 facilities) must submit the information required under this section.

(2) Permits for Land Treatment Demonstrations Using Field Test or Laboratory Analyses

All owners and operators of land treatment unit facilities applying for a Part B permit (zero facilities) must submit the information required under this section.

(3) Research, Development, and Demonstration (RD&D) Permits

All owners and operators of facilities applying for a RD&D permit (three facilities) must submit the information required under this section.

Interim Status**Termination of Interim Status**

EPA does not expect there to be any regulatory or statutory amendments that would cause land disposal facilities to come under new permit requirements during the period covered by this ICR. Therefore, EPA does not expect any land disposal facilities to submit a certification.
